FINANCE AND TRADE.

AT THE BANKS, being the second of the month, there was some activity in CHICKENS-Young, \$1 75@3 25; fine checking and depositing, but In every-ones, \$4; old, \$4 50; fine hens, \$5; sale the month, there was some activity in prevailed. There are symptoms, however, that loans will be wanted, and acis at an end. Exchange was dull as at 14c. usual, but the continued quiet does not change rates from what they were when cotton was active, and we quote, once dull at \$5(0)7 50. more, buying on New York at par, selling at 4 premium; New Orleans 4 discount, selling at par. Gold was again above 117, quoting at 1171; brokers here offered 1161. The New York Bulletin say : "There is little doubt that shipments of gold will be renewed this week on a large scale, and among the bankers it is a common expectation that the price will, during the next two months, advance to the neighborhood of 120. have no prediction to record, regarding it as a matter to be determined by the export of securities; if this is large enough to make the exchange wanted, shipments will be small and the present price will be found high; otherwise, an indvance is reasonably sure." The following from the St. Louis Bulletin, July 1st, is of interest: "There has probably never been a more complicated condition of trade in St. Louis than exists at resent, or which has prevailed for some past. It has given our judicious merchants more ordinary thoughtfulness and regard future. The better class of traders have all along taken the situation into deliberate consideration, regarding the outlook with justifiable apprehensions. Recently there has opened up a more hopeful prospect, in view of the cheerful erop reports, and the solution of the business problem assumes measurably definite shape. Provisions have worn a dismal look until the past few days, but holders are now much more buoyant, there being a lively movement at the principal centers, together with a marked increase in the southern inquiry, upon which we are largely dependent for active patronage. The grasshopper has ceased to be so much of a burden as formerly, and we have an says a Mr. Henry, of that locality, sold irleen hundred scres of wheat in the field for twenty-seven thousand dollars cash. This is one among many features that go to make up the flattering business surroundings, and what may uitimately be expected in the fall trade."

THE COTTON MARKET was quiet and uninteresting. There was little inquiry, the small stock admits of little display of samples, there was therefore little done.
